MAXIMUM 7 SERIES

COMPACT - VERSATILE - ECONOMICAL - EASY TO OPERATE

Shipping cartons are delivered to your plant "knocked-down" or flat and must be opened for loading. While this seems simple enough on the surface, finding the most efficient way to erect cases often is not. A.B. Sealer's MAXIMUM Series Automatic Case Erectors are a cost-effective alternative to hand forming or using cumbersome machines. They offer unique performance capabilities including:

- Speeds up to 15 cases per minute of rectangular or square cases in RSC, HSC, OR CSSC styles
- Operator-friendly design allows for rapid case-size changeover in minutes
- 100 KD case magazine designed for easy loading during machine operation
- Choice of sealers including pressure-sensitive tape or hot-melt glue adhesive
- "On-Demand" operation standard for total control of erected case output
- Intuitive operation makes start-up and training easy
- Accommodate the widest range of rectangular, square, RSC, HSC, and CSSC style cases
- Optional casters offer true portability for machine placement inside your plant

A.B. Sealer MAXIMUM Series Case Erectors have proven to handle the toughest applications in virtually every industry from food and pharmaceutical to consumer and industrial products. Robust standard case erector platforms are designed with simplicity, versatility, and ease of operation in mind. Individual customer specifications are easily incorporated in the machine platforms. Standard models feature:

- Compact designs that save valuable floor space
- Engineered simplicity reduces the number of moving parts for increased reliability
- Heavy-duty, plate-steel, side-belt drive assembly for positive case transfer

HOT MELT CASE ERECTOR

A.B. Sealer also has the Hot Melt Case Erector when you need glue instead of tape. The Hot Melt offers the same compact footprint as the MAXIMUM Series Erectors. A.B. Sealer's fully automatic Hot Melt Case Erector is capable of speeds up to 10 cases per minute with easy change-over which will allow for maximum production!

CES25 4-PACK/6-PACK ERECTOR & INSERTER

- 4/Packs and 6/Packs in one machine
- One incredibly compact footprint
- Baskets are conveyed in the upright position for easy loading
- Quick and easy adjustments

A.B. SEALER CASE ERECTOR STANDARDS

- Swing-Arm Stabilizer
- Obstruction Indicator
- On-Demand Cycling
- Door Safety Interlocks

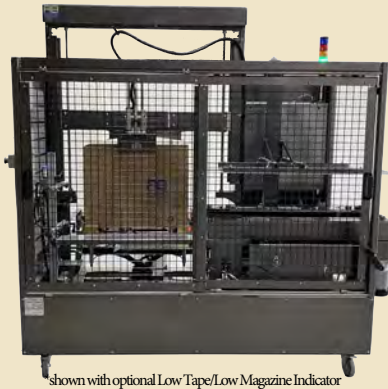

OPTIONS

- Industrial-Duty Casters
- Automatic Filter Drain
- Low Tape Indicator
- Low Case Magazine Indicator
- Extended Case Magazine
- Stainless Steel Construction

STANDARD MACHINE SPECIFICATIONS

Controls

- PLC/Pneumatic Valve Bank

Air Consumption

- 90PSI, 18 CFM/cycle

Magazine Capacity

- Up to 100 cases depending on case construction

Bottom Close/Sealing

- Pressure-sensitive tape or hot-melt adhesive

Electrical Requirements

- 110VAC (10 amp total draw @ 110V)
- 220VAC for Hot Melt Glue Machine

DIMENSIONS

MAXIMUM 5 SERIES

- A: 90"
- B: 68.5"
- C: 80"
- D: 23.5"

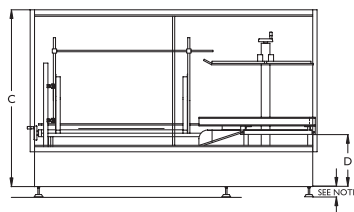

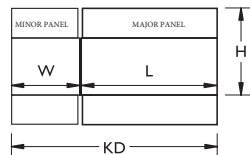

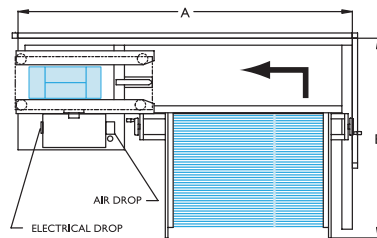

MAXIMUM 7 SERIES

- A: 112"
- B: 73.6"
- C: 88.4"
- D: 28"

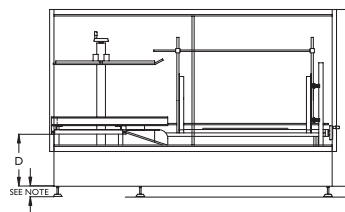

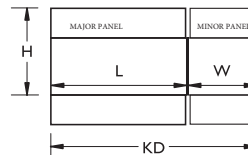

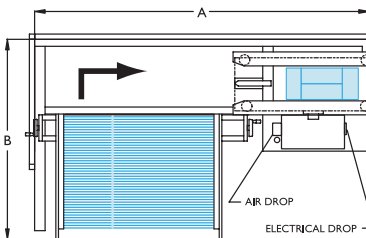

CASE SIZE CAPABILITIES & MACHINE DIMENSIONS

A.B. Sealer case erectors are available in both right-hand and left-hand discharge orientations.

Left-Hand Orientation

Right-Hand Orientation

HOT MELT CASE ERECTOR

- A: 112"
- B: 67.85"
- C: 88.09"
- D: 26"

NOTE: Casters add 6 1/4" and adjustable footpads add 2" - 4 1/2".
